REASON FOR ALLOWANCE

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance, with respect to claims 1, and 7 the references of the record fail to teach or suggest:

Claims 1, 7:

A semiconductor laser driving circuit including a differential output receiving complementary inputs and output to output terminals comprising: an RC filter or filters with a switch connecting between first and second output terminals, two ends of a switching element, two ends of at least one resistor, and two ends of at least one capacitor in series; where two or more resistors units connected in series between a power supply and the first output terminal; a high-pass or bandpass filter(s) receives an output from a point between the two resistors, and passes a component not lower than a predetermined frequency; a detector rectifier(s) receives a signal through the high-pass or banpass filter(s) and converts and output the signal into a DC or low-frequency component; where a hysteresis comparator(s) receives output from detection rectifier(s), and output an ON signal if the output exceeds the high threshold, until the output is lower than a low-potential threshold value; wherein the switching element(s) is turned on and said RC filter with the switch starts according when the output ON signal from the hysteresis comparator(s) is supplied to the switching element.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
